

Rivestimenti e finiture

Upholsteries and finishes

AVVERTENZE GENERALI

I colori chiari, non devono essere messi a contatto con tessuti e capi d'abbigliamento trattati con coloranti non fissati, o con scarse solidità di tintura, onde evitare macchie ed aloni di coloranti di cui non possiamo garantire la pulitura.

I tessuti spalmati (ecopelli) possono essere sanificati superficialmente come da decreto del Ministero della Salute con soluzioni di acqua e alcool etilico al 70% e prodotti disinfettanti commerciali pronti all'uso. Si consiglia di provare il prodotto su un angolo nascosto della superficie da pulire.

Evidenziamo speciali trattamenti, antimicrobici, antibatterici e antimicotici, che caratterizzano da sempre alcuni nostri rivestimenti, per creare un'efficace barriera difensiva contro batteri, acari e funghi, uniti ad eccezionali caratteristiche di praticità e durata nel tempo.

GENERAL WARNINGS

To avoid permanent stains, the lighter colours of the article should not be brought into contact with textiles and clothing unfixed dyes. We cannot guarantee the ability to remove unknown dyes from light coloured product.

The coated fabrics (eco-leathers) can be superficially sanitized as per the Decree of the Italian Ministry of Health with solutions of water and 70% ethyl alcohol and commercial disinfectant products ready for use. We suggest to test the product on a small hidden corner of the surface you need to clean.

We focus your attention on special antimicrobial, antibacterial and antifungal treatments, which have always distinguished some of our coatings to create a valid defensive barrier against bacteria, mites and fungi, combined with exceptional features of practicality and durability.
